JOIN US FOR GENERAL SESSIONS AND EVENING EVENTS

2:30 p.m. - 3:30 p.m.

Turning Up the Heat: Are Bed Bugs Developing Resistance to Heat Treatments?

Ameya Gondhalekar, Ph.D., Purdue University, West Lafayette, Indiana

Heat treatments continue to be a popular method of control for bed bugs. But like all management efforts, there is no "silver bullet" for control. Heat resistance is well documented in other pest species – the question is whether bed bugs are becoming resistant to heat too. Find out more in this session featuring research sponsored by the Pest Management Foundation.

3:45 p.m. - 4:45 p.m.

Bed Bug Prevention: A New Look at Integrating Solutions for Keeping Bed Bugs at Bay

Susan Jones, Ph.D., Ohio State University, Columbus, Ohio

Controlling bed bugs once an infestation has taken hold is difficult, but devising a strategy for preventing bed bugs in the first place takes cooperation from everyone involved - tenants,

property managers, and pest management professionals. In this forward-thinking session learn about the latest ideas regarding bed bug prevention protocols and how your company can integrate bed bug prevention into your service offerings in the future.

5:30 p.m. - 7:00 p.m.

Beer Tasting in EXPOCentral

Beer tasting in EXPOCentral provides a great opportunity to see the best in bed bug products and services and features the famous FREE reception, where you'll mingle with industry experts, manufacturers, friends and colleagues while sampling a variety of micro-brews and local fare.

7:00 p.m. - 9:00 p.m.

Night Out with the Experts

We invite you to join our Summit's leading speakers and bed bug experts for a casual night of questions and fun interaction. This will be a unique opportunity to relax with your peers and have some great conversations while you're at it.
